-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a process/combination, classified in class 701, subclass 209.
- II. Claims 9-11, drawn to a process/subcombination, classified in class 455, subclass 411.
- III. Claims 12-15, drawn to a product, classified in class 703, subclass 22.
- IV. Claims 16-20, drawn to an apparatus, classified in class 348, subclass 211.3

2. Inventions I/II/III and IV are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process, for example a process of transmitting a navigation map from a traffic management center based on the location of the vehicle, wherein said vehicle location is transmitted to the traffic management center during a request of a navigation map.

3. Inventions I/II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially

Art Unit: 3663

different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the product as claimed can be used in a materially different process of using that product, it can be in the process of guiding a trailer moving from one waypoint to another waypoint in a specific region.

4. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed since the details of the “generating...” and “transmitting...” are not required for patentability of the combination. The subcombination has separate utility such as relevant medical record of a patient is transmitted from a medical center in response to the request of medical technician while they are on the way, wherein the request transmitted from a medical technician includes the location of the patient.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art shown by their different classification, restriction for examination purpose as indicated is proper.

Species Election:

6. Upon election of invention I, II, III, or IV, the applicant is further required under 35 U.S.C 121 to elect one of the following disclosed species for prosecution on the merits

Art Unit: 3663

to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims appear to be generic):

A. Embodiment of figures 2a, 4a, and 4b.

B. Embodiment of figures 2b, 4c, and 4d.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be

Art Unit: 3663

traversed (37 CFR 1.143).

Conclusions

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (571) 272-6985.
